Work Experience

- Deloitte Consulting**
Consultant | 2021 - Present
- Informed the UX/UI design and communicated design needs to functional stakeholders and technical team
 - Created and updated high fidelity prototypes that align with the functional business requirements and presented these to leadership and product stakeholders
 - Pitched and drove forward the redesign effort of the UI, focusing on improving user experience and consistency across the design as well as best practices for UI design, such as usability testing of the mocks to inform design decisions

Cornell University

- Design & Programming For The Web Teaching Assistant | 2018-2020**
- Taught design principles, frontend development, database construction to 30+ students for introductory and intermediate level courses
 - Provided personalized support for students through weekly office hours, both in groups and one-on-one
 - Evaluated projects and provided feedback to strengthen students' skills in UX/UI design, JavaScript, SQL, HTML, CSS, and PHP

Deloitte Consulting

- Summer Scholar | 2019-2019**
- Led an imperative effort to streamline the testing process for Application and Integration testing of the EPIC Software
 - Supported refresh of onboarding and off boarding training artifacts for the EPIC implementation project team
 - Supported a growing relationship between Deloitte and a client by displaying Deloitte's expertise in health technology
